Dear Dept of Labor,

Far from protecting investors, this proposed rule will inflict further damage on investors already battered by the artificially low interest rate environment imposed by the Federal Reserve. Retirees need all the means possible to gain income, and writing covered call options, for example on positions already held in retiree's account is a safe and proven method of generating income on retirement assets.

I will vote against either/both of my elected representatives if this measure ever comes to a vote in Congress and receives a Yea from one or both of them.

It is high time that people take responsibility for their own lives and actions, rather than ceding more power to a government which already has far too much control over investor finances.

Sincerely,

Donald L. Keeler
